

Water soluble GARMENT BAGS

Why do you need water soluble garment bags ?

It's estimated that the fashion industry creates between 80 and 100 billion garments a year with the vast majority of these being packed in polyethylene plastic bags.

Our Hydroplast garment bag is a perfect solution to this ongoing problem.

It maintains all the benefits of a traditional polybag to protect your garments during transportation, but with added safe end of life disposal methods..

WATER SOLUBLE

HOT WATER SOLUBLE

Our garment bags can be fully dissolved in hot water above 70 degrees Celsius.

BIODEGRADABLE

APPLICATIONS

Keeps items fully protected during transport, from factory all the way to the end consumer.

MARINE SAFE

GARMENT BAG SIZES

*Standard size available in bundles of 250 pieces
W300mm x L400mm + 50mm flap with self adhesive, 25 microns
Can be fully customised subject to MOQ*

What are the Benefits

Reducing the amount of PE in the fashion industry

Easy to open, straight from the box

Puncture-resistant and durable

Excellent bacterial barrier properties

Range of safe end of life disposal methods

The bag completely dissolves

Breaks down to natural biomass, CO₂, and water

Safe for the environment
