

Water Soluble CYTOTOXIC LAUNDRY BAGS

Why do you need cytotoxic laundry bags?

Cytotoxic linen is linen that has been indirectly contaminated through the bodily fluids of a patient who has received cytotoxic drugs. This includes urine, faeces, perspiration, and blood from a patient who has received the drug within the last 7 days.

WATER SOLUBLE

HOT WATER SOLUBLE

Laundry bags are designed to be placed directly into the washing machine and will completely dissolve during the commercial laundry cycle. Hot wash cycles above 70 degrees Celsius.

BIODEGRADABLE

APPLICATIONS

Can be used in hospitals and medical facilities, where laundry is washed in a commercial laundry.

MARINE SAFE

LAUNDRY BAG SIZES

*660 x 840 x 20 microns
710 x 990 x 20 microns
Integrated soluble ties.*

What are the Benefits

Affected linen can be bagged and identified

Reduced staff risk when handling laundry

OHS risk is mitigated

Easy to open, straight from the box

Puncture-resistant and durable

Excellent bacterial barrier properties

Drastically reduces incineration

The bag completely dissolves

Safe for the environment
